

Sidi Mohammed Kaddour

R&D Engineer

medkaddourr@gmail.com +33 751 367 949

medkaddour.github.io Nantes , Pays de la Loire , FR

Scientific researcher focused on feedback mechanisms for Edge-to-Cloud applications, adaptive systems, and monitoring.

WORK

2024.12 - 2026.11

R&D Engineer

STACK/INRIA

developing an extension for Ansible that integrates the coordination mechanisms of Concerto.

- Integrate Concerto with Ansible

2023.12 - 2024.11

R&D Engineer

STACK/IMT Atlantique

Research and development in Edge-to-Cloud continuum, including feedback mechanisms and Ansible integration.

- Developed adaptive feedback mechanisms
- Executed experiments on Grid’5000

2019.06 - 2019.08

Visiting PhD Student

Bournemouth University

Worked on smart energy solutions using machine learning.

2018.07 - 2023.09

Project Manager & Odoo Senior Developer

Groupe Kherbouche

Led ERP projects and customized Odoo modules for internal business processes.

2017.09 - 2020.09

Temporary University Teacher

University of Tlemcen

Taught Cloud Computing, Advanced OS, and Signal Processing.

EDUCATION

2016.11 - 2023.11

PhD

University of Tlemcen

Networks and Distributed Systems

2014.09 - 2016.06

Master

University of Tlemcen

Networks and Distributed Systems

2011.09 - 2014.06

Bachelor

University of Tlemcen

Computer Science

2008.09 - 2011.07

Baccalaureate

Mostafa Mostfai High School

Sciences

CERTIFICATES

ISO 9001 TRAINING

Groupe Kherbouche 2022-01-01

ISO 19011 INTERNAL AUDITOR
CERTIFICATION

Groupe Kherbouche 2022-01-01

ITIL V4 FOUNDATION TRAINING

AXELOS 2021-01-01

PUBLICATIONS

2024.03.01

Proteus: Towards Intent-driven Automated Resource Management Framework

ACM

2024.02.28

Event Detection for Non-intrusive Load Monitoring Using Tukey’s Fences

PROJECTS

2024.01 - 2024.12

Edge-to-Cloud Video Processing

Motion detection at edge and object recognition in cloud using YOLO, instrumented with feedback mechanisms.

2025.01 - Present

Ansible + Concerto Extension

Ansible module for dynamic software reconfiguration using Concerto models.
